

DOT EXAMINATIONS

Please review the following list of medical conditions which may need to be evaluated by your primary doctor or specialist prior to undergoing your Medical certification examination.

Following the listing of conditions, you will be able to print off a letter to give to your primary care or specialist which explains to them what is required. Also there is a form letter your primary care physician and/or specialist may fill out to for a letter of clearance.

If any questions remain, please feel free to stop by or call our clinic for assistance.
